

COMPLETE TURN-KEY SHELL
CONTRACTORS

SHELL SERVICE LINES

Cast in Place Concrete Services

Our crews have years of experience in slab and concrete construction, we deliver turnkey monolithic and stem-wall slabs for National, Regional, and Custom Builders throughout Florida and the South East with the highest levels of efficiency, quality, and attention to detail.

Whether it is a commercial project requiring post-tension work, a large multi-family project, or a single family home, WW Build, Inc., has the expertise, equipment, and experienced labor to bring your project to completion, on time and on budget.

Flatwork services also include: Demolition and removal of existing cracked and degraded concrete. Prep, Form, Pour, and Finish new concrete for sidewalks, driveways, hardscapes and landscape areas.

Masonry Block Services

WW Build, Inc. is a residential and commercial masonry contractor servicing the entire state of Florida with concentrations in Central Florida.

We have built our reputation on challenging projects and quality work. With an extremely strong supervisor staff, there is no project too complex for our staff to handle. With the steady growth philosophy, we have managed to balance multi-million dollar projects as well as small projects and many others in between at the same time.

We work with all styles of C.M.U., in all phases of construction. From foundations and stone veneers to block and specialty veneers, we deliver quality workmanship and reliability at a reasonable cost.

Rough Carpentry & Framing Services

We provide Builders and Developers with professional, cost effective and quality framing services. Our staff members have many years of experience working together in the rough framing industry and are well equipped to complete your project to your satisfaction. Our commitment to quality and production has made us a leader in the industry.

We have experience and specialize in small complex to large Commercial Centers, Multifamily, and everything else in between. We perform wood framing structures from ground up construction to complex retro fits. We are committed to providing excellent service, communication, and competitive rates while still producing a quality product and always keeping a tight schedule in mind.

MEET OUR TEAM

Christopher Weldon, CGC, CBC, HI, AIBD | PRESIDENT, FOUNDING SENIOR PARTNER

Meet our Designer & Builder - He has had extensive experience in both the structural design, engineering, and construction of both Residential and Commercial projects in Florida, surrounding states, and even Internationally. Chris started his career learning the trade as a rough carpenter at a young age right out of the military. Moved on to intergral design and engineering for both residential, multi-family, and commercial construction, and has over 30 years in the industry, and is a licensed Florida State Certified General Contractor.

Robert Wilferd | VICE PRESIDENT, FOUNDING SENIOR PARTNER

Meet our Director of Operations - A life long resident of Central Florida, Robert has extensive experience in shell construction. 35+ years of experience with residential, commercial, and multi-family projects. Robert is responsible for planning and overseeing all projects with a wide range of scopes from beginning to end. He balances the budget, keep track of supplies, collaborate with subcontractors, and ensure all regulations are met and permits acquired.

Tom Tighe | GENERAL MANAGER

Meet our General Manager - Tom has many years of experience in the construction industry. He is well versed in all areas of construction both Specialty and General Contracting. Tom is responsible for managing the day-to-day operations of all construction projects, ensuring that it is completed on time, within budget, and in compliance with legal and safety requirements.

Cory Voit | PROJECT MANAGER

Meet our project manager - Cory is experienced in the service industry and customer service orientated with running high profile projects in and around Central Florida. Primarily working in our Residential field, Cory is instrumental in our local projects with contractor/subcontractor scheduling, coordination, planning, and implementation.

Our Service Area

WHY WW BUILD?

Why Use A Shell Contractor

The core concept of base build, also known as shell and core construction, is that the construction is simply the basic structure of a building. Afterward, a range of build-out and interior construction work is completed before the building is occupied.

The shell of a building is the component that separates the interior space of the structure from its exterior and surrounding areas. It can have a number of features, most commonly the footers, slab, CMU block, framing, truss installation, and decking.

Because this is a Turn Key solution, the builder/developer/owner usually is hands off until the shell is complete.

Complete Turn Key Operations

- Cast in Place Concrete Slabs and Foundations
- Masonry CMU Block & Stone
- Rough Carpentry and Framing
- Flatwork and Hardscapes

Scheduling Coordination

Because we supply all the key trades for a complete shell package, our scheduling between phases are completely coordinated (to include builders MEP trades) in house and become a seamless transition allowing a faster, more thorough, and quality product for our clients.

Industry Leading Standards

Whether it be Design/Engineering, Estimating, Site Labor, Construction Materials, or Safety Programs, our years of experience have created an atmosphere developing superior industry standards both on-site and off.
